Innovative Additive Manufacturing Technology Africa

Forum & Exhibition

30 October 2019
IDC, Sandton

Additive Manufacturing commonly referred to as **3D-Printing** is a disruptive technology that will impact various industries and provides endless opportunities for companies willing to rethink their operations.

Be part of the inaugural **I AM Tech – Africa** Forum & Exhibition. An annual event showcasing the latest innovative additive manufacturing and technological advances impacting business today and its possibilities into the future.

The 1-Day forum consists of 4 plenary sessions followed by an exhibition and networking reception. This year the first **I AM Tech – Africa** Forum will also be an official side event of the **Southern Africa Europe CEO Dialogue**.

An official side event of the:

I AM Tech – Africa is for C-level business executives, HoD's of Manufacturing, Supply Chain/Procurement, Engineering/Maintenance, Information Technology, R&D, as well as all individuals, industry associations, universities, and institutions interested in adopting innovative 3D-Printing technologies or companies part of the additive manufacturing value chain.

The **I AM Tech – Africa** Forum and Exhibition will introduce a path towards adopting additive manufacturing technologies that will save time and money, ultimately increasing competitiveness.

A 3D-Printing Technology Forum & Exhibition for Business Leaders
